

FileMaker Pro 3.0 for Macintosh and Windows

New for Macintosh

- ▶ Runs native on all Power Macintosh and compatible computers.
- ▶ AppleScript support includes Apple Events in ScriptMaker™ scripts – even using FileMaker Pro field values. Or create even more powerful, portable solutions by attaching complete AppleScript applets.
- ▶ PlainTalk support on Macintosh allows contents of files to be spoken.
- ▶ AppleTalk, MacIPX, and TCP/IP support uses built-in networking for peer-to-peer file sharing over a network.

New for Windows 95

- ▶ Specifically designed for Windows 95, including 32 bit multi-tasking, long file names and right mouse button menus.
- ▶ OLE 2.0 support allows you to drag and drop or insert OLE 2.0 objects for anything from charts to AVI movies. Supports linking, embedding and even in-place editing.
- ▶ Send mail directly from FileMaker Pro via MAPI. Create mail messages as you work or incorporate database field values for custom e-mail solutions.
- ▶ Integrate FileMaker Pro solutions with other Windows products by sending them DDE Execute commands.

FileMaker™ Pro software is the only relational database application designed to help you easily manage and share information in the real world. Starting with raw data, it's fast and easy to create working databases on Windows 95, Windows NT or Macintosh. In fact, FileMaker Pro comes with 6 ready-to-use templates for instant business, education and home solutions.

When you're ready to customise your database, FileMaker Pro has a set of powerful, yet extraordinarily easy-to-use tools that will take you well beyond where standardised wizards and other assistance technologies leave you. Create stunning input screens, reports, labels and mail merge letters in a flash. Automate frequently-used procedures and sequences – and much more.

Best of all, you don't have to become a database expert in order to take advantage of FileMaker Pro software's full potential. Instead of separating your database into different parts such as data, forms, queries, reports, scripts, etc., FileMaker Pro integrates everything for you so you can focus on the task at hand instead of co-ordinating lots of smaller elements. Even relational capability is built into this intuitive, integrated design, making it easier to 'design as you go' than with other database products.

With all these advantages, it's no wonder that growing businesses, as well as schools and home users, have come to depend on FileMaker Pro 3.0. Nothing makes it easier to organise all your vital information and put it at your fingertips.

Claris. *Simply powerful software.*™

*FileMaker Pro –
The easy-to-use relational database.*

FileMaker Pro 3.0

for Macintosh and Windows

Get Started Easily

Features	Benefits
* Professional Templates	Get started quickly with 6 ready-to-run productivity solutions for business, education and home – including Message Database, Names and Addresses for a contact list, Certificates, Student Records, Cheque Tracker and Home Inventory.
* Import/Export Capabilities	Automatically create database files using raw data from other programs including spreadsheets, word processors and other databases.
Data Handling Flexibility	Add, change or remove fields, layouts or calculations at any time without rebuilding the database.
Variable Field Length	Add notes and comments to any database record with up to 64,000 characters in any formatted text fields.
Auto Indexing	Find records fast without the complexity of managing index files – automatically indexes fields.

Make it Look the Way You Want

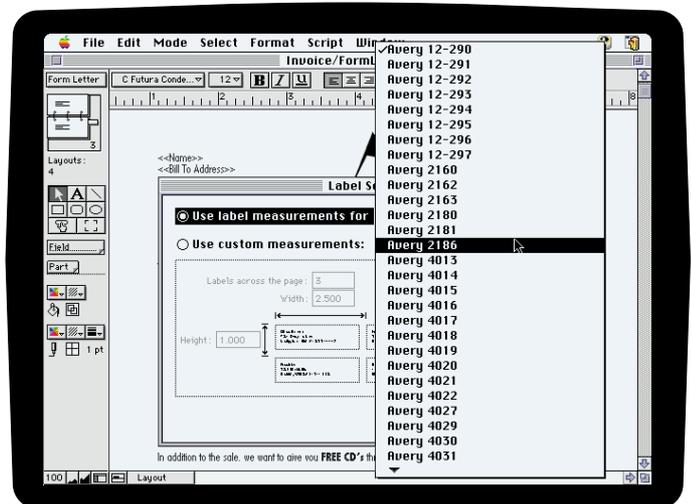

Features	Benefits
Multiple Layouts	Design multiple layouts to view, enter and print your information by simply dragging and dropping fields from the current file or related files on a layout.
Graphical Report Creation	Create reports and summaries to many levels of detail with graphical report designer.
* Mail Merge	Word processing-style mail merge for customised letters and more.
* Integrated Text Handling	Access word processing functionality in any text field including text rulers, tabs, indents and more.
* Import Graphic Files	Easily enhance your fields with graphics in most popular file formats – for both Macintosh and Windows – and with OLE 2.0 objects in Windows.
Integrate Multimedia	QuickTime lets you easily cut, copy and paste anything from video footage to animation and sound, as well as still images into your database.

* New or improved features

FileMaker Pro. The easy-to-use rela

Creating powerful databases quickly has never been so easy. Just choose the template that's right for you and enter your data – that's all there is to it!

Labels are ready in seconds – just select the pre-formatted label stock from the built-in list, and it's done.

Access and Manage Data with Ease

Features	Benefits
Custom Field Formats	Accelerate data entry with customisable radio buttons, check boxes, pop-up menus and more – even use data from related files.
Automatic Data Entry	Save time by inserting the current date or time, specific text, values from the previous record and more – even calculated values.
Data-Lookup Capabilities	Automatically copy and paste data between related files to avoid repetitive data entry.
Serialise Records	Automatically number or serialise records to create invoice, part, account numbers and more.
Validate Data Entry	Ensure data is correct by requiring that it be unique, a certain type (e.g. number), a member of a value list or correct based on a custom calculation formula.
Versatile Find Function	Retrieve only the information you need by specifying search parameters: range, less than, greater than, and/or/not, exact match, empty, duplicate, wildcard or literal text searches.
Flexible Sort Capability	Sort data using any field with just a few mouse clicks.
Automatic Phone Dialing	Instruct FileMaker Pro to dial any phone number via speaker (Mac only) or modem using scripts or buttons.
Built-in Spell Checker	Eliminates spelling errors from records, reports and layouts.

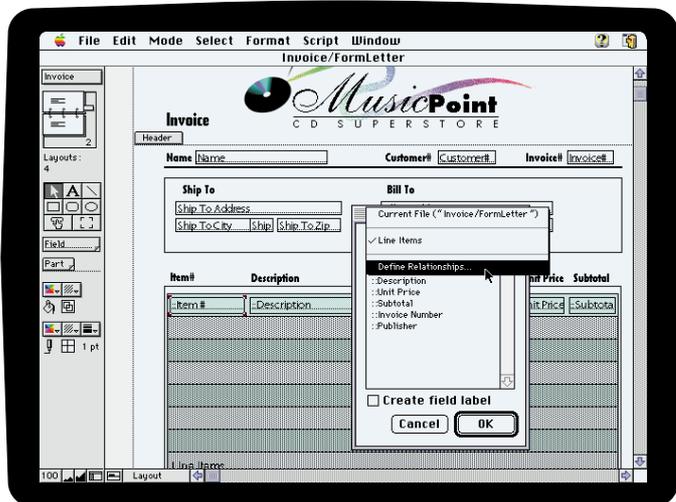

Powerful Data Management

Features	Benefits
★ Relational Database Power	Increase the power and flexibility of your databases by creating one-to-one, one-to-many, and many-to-many relationships between files. View and edit data from one file while working in another so you can store data once while using it anywhere.
★ Powerful Calculations	Use more than 100 calculation functions to automatically enter, validate and analyse data.
★ Powerful ScriptMaker	Automate routine tasks and menu commands with the ScriptMaker feature – anything from dialing the phone to loops and conditional branching.
★ User-definable Buttons	Easily customise the appearance and operation of your files with buttons you create in a single step.
Built-in Database File Utilities	Easily back-up, duplicate, compress and make templates of your existing files.

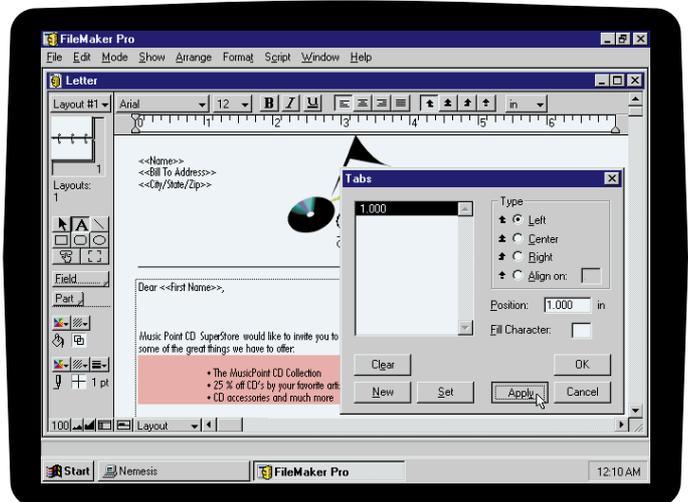

Share Information

Features	Benefits
Platform Transparency	Share files seamlessly between Windows and Macintosh versions of FileMaker Pro – even over the network.
Password Protection	Protect your data to the layout and field level with password control.
Instant File Updating	Automatic updating keeps you current by reflecting changes made by any user accessing your database over a network.
Network File Sharing	Convert your database into a networked solution in one simple menu step. Share files easily within your Windows, Macintosh or mixed workgroups.
Automatic Record Locking	Ensures data integrity of personal or workgroup databases and eliminates simultaneous multi-user network conflict.

onal database

Start setting up relational databases by simply dragging and dropping fields on a layout.

Give all your documents – reports, invoices, mail merge letters and more – a professional look with word processing functionality.

FileMaker Pro 3.0

for Macintosh and Windows

While FileMaker Pro 3.0 for Macintosh and Windows share the same graphical user interface, both versions have been optimised for their respective operating systems. That means Macintosh users can take full advantage of their Macintosh system and PC users can take full advantage of their Windows 95 interface.

FOR MACINTOSH

Import/Export Formats Supported

- ▶ FileMaker Pro 3.0, FileMaker Pro 2.X via conversion, Tab-Separated Text, Comma-Separated Text, ClarisWorks™ 3.0 database files, DBF, SYLK, DIF, WKS (WK1– import and export, WKS – import only) and Merge

Graphics File Formats Supported

- ▶ MacPaint™ PICT PICT2, EPSF, TIFF and others via XTND filters and DataViz Graphic Translators (available separately)

Required Equipment

- ▶ Apple Macintosh, Power Macintosh or compatible computer running System 7.0 or later (System 7.1 or later recommended)
- ▶ Hard disk drive and 4MB RAM (8MB recommended for 680x0 Macintosh, 8MB required for Power Macintosh)
- ▶ CD-ROM drive – Software, Help and Tutorial included on 1.4MB high density disks and CD-ROM
- ▶ Supports AppleTalk, IPX/SPX and TCP/IP networks for multi-user file sharing (Open Transport compatible)

Printer Support

- ▶ Apple LaserWriter, Personal LaserWriter, ImageWriter families and Apple StyleWriter
- ▶ Hewlett Packard LaserJet, DeskWriter and PaintJet series
- ▶ A wide variety of other Macintosh-compatible printers

FOR WINDOWS 95

Import/Export Formats Supported

- ▶ FileMaker Pro 3.0, FileMaker Pro 2.X via conversion, Tab-Separated Text, Comma-Separated Text, ClarisWorks 3.0 database files, DBF, SYLK, DIF, WKS (WK1– import and export, WKS – import only) and Merge

Graphics File Formats Supported

- ▶ Computer Graphics Metaphile (CGM), Micrografx Designer (DRW), HP Graphics Language (PLT), Lotus Picture (PIC), Tag Image File Format (TIF), CompuServe GIF (GIF), ZSoft Paintbrush (PCX), Autocad Slide (SLD), Windows Bitmap (BMP), Aldus/Windows Metafile (WMF), Macintosh PICT (PCT), MacPaint (MAC) and Encapsulated PostScript (EPS)

Required Equipment

- ▶ Intel compatible PC running Windows 95 or Windows NT 3.51 or newer
- ▶ 8MB RAM (16MB recommended for Windows NT 3.51)
- ▶ CD-ROM drive; Software, Help, and Tutorial included on 1.4MB high density disks and CD-ROM
- ▶ Supports Microsoft compatible IPX/SPX and TCP/IP networks for multi-user file sharing

Printer Support

- ▶ Hewlett Packard LaserJet, PaintJet and DeskJet Series
- ▶ PostScript printers such as Apple LaserWriter and IBM LaserPrinters
- ▶ A wide variety of other Windows-compatible printers
