

# At Ease 3.0

Now there's a simple, effective and inexpensive way to share your family Macintosh™ — while protecting important applications and documents.

Only At Ease™ 3.0 software from Apple offers this security with a choice of interfaces for every age and experience level. For younger learners and computer novices there's the friendly At Ease desktop. It features large buttons that can speak, for accessing files and applications, and large folders for keeping everything organised. It lets children work and play independently without you worrying about accidental damage to your files.

Older children can use the standard Macintosh Finder™ interface, but still under At Ease management to prevent access to unauthorised applications and documents. Finally, you and anyone else you authorise can bypass At Ease and gain access to all of the computer's files and capabilities. At Ease keeps pace with every member of your family.

Each At Ease user has one folder containing approved applications, files and other items; and one folder for the user's own documents. In version 3.0, each CD or floppy disk also conveniently appears in its own folder.

Easy-to-use set-up menus let you quickly designate which desktop each person will use and which applications and documents they can open. Adding an item to a user's folder is quick and easy. You can also control permissions for deleting, copying and renaming specific files, and you can create a list of allowable CD-ROMs to ensure that users access only permitted materials.

Because At Ease software comes from Apple, you're assured that it is designed to work smoothly with your Macintosh. At Ease can be used not only at home, but also on shared, non-networked Macintosh systems in classrooms, small businesses, libraries and museums.

With At Ease 3.0, you can feel good about sharing your family Macintosh.

## Features

### Flexibility

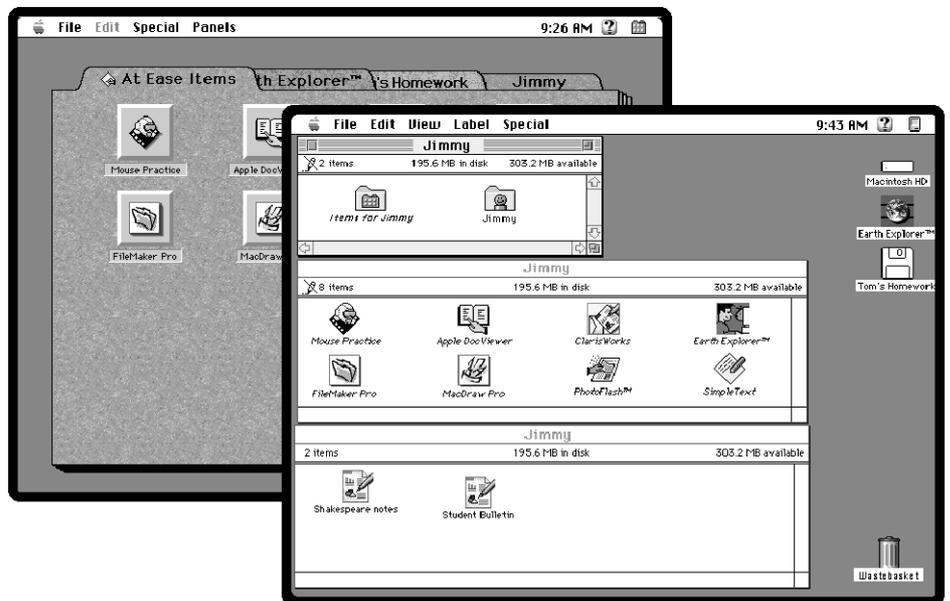

- Simplified At Ease desktop for young or inexperienced users
- Restricted Finder interface for experienced users
- Normal Finder interface for authorised full-access users
- Separate At Ease folder for each CD-ROM or floppy disk
- Support for up to 40 different users

### Security

- Designate access to specific applications and documents
- Specify privileges for opening, copying, deleting and renaming particular files
- Assign individual user passwords
- Authorise the use of individual CD-ROMs and their contents
- Block access to the hard disk
- Prevent applications from being launched from floppy disks
- Protect system settings, control panels and the Chooser

### Ease of use

- Large one-click buttons to access files and applications from the At Ease desktop
- Fast, simple installation and set-up
- Talking buttons for non-readers or those just learning to read
- Single folder for organising personal documents

## Ordering Information

### At Ease 3.0

- At Ease software
- Owner's manual

Apple also offers At Ease for Workgroups software for networked systems; contact your local distributor for details.

At Ease is available for volume licensing through the ClarisPlus programme. Contact your local distributor for details.

## Technical Specifications

### Access levels

- At Ease desktop
- Restricted Finder
- Normal Finder

### File and media access

- Manage access to:
  - Applications
  - Documents
  - Hard disk
  - Apple Menu items (desk accessories, Chooser and control panels)
  - CD-ROMs
  - Floppy disks
- Assign separate permissions for opening, copying, deleting and renaming files

### CD-ROM access

- Contents of each disc appear in a separate At Ease folder
- List of allowable CD-ROMs can be created
- Within the At Ease desktop, specific portions of a disc can be locked out

### Floppy disk access

- Contents of each floppy disk appear in a separate At Ease folder
- Application-launching from floppy disks can be disabled

### File-saving options

- Users can save documents to a floppy disk and to a private folder on the local hard disk
- Document-saving can be disabled

## Easy set-up and maintenance

- Set-up application provides easy-to-use configuration screens for designating users, items, menus, file locations and other options
- Apple Guide support gives Macintosh System 7.5 users step-by-step context-sensitive help for using the At Ease desktop and the set-up application

## System requirements

- Apple™ Macintosh, PowerBook™ or Power Macintosh™ computer
- 4MB of RAM
- Macintosh system software version 7.0 or later
- Hard disk
- Apple SuperDrive™ 1.4MB floppy disk drive

*At Ease 3.0 makes it easier to share your family Macintosh by giving users access to their own At Ease items and documents.*

*At Ease 3.0 uses a simple set-up application that guides you through the process of creating an At Ease configuration for each user.*
