

LogDoor User's Guide

Welcome to LogDoor. The LogDoor(TM) Multi-domain Web Site Monitor, from **Open Door Networks Inc.** provides a real-time display of accesses to your Macintosh Web server on a domain-by-domain or site-by-site basis. LogDoor also produces real-time individual log files and Web-accessible summaries for each site on your server. With LogDoor, both you and your site owners will have a much better insight into how your Web pages are actually being accessed.
