

## SPLASH TRACKER

Splash Tracker is a stunning little DHTML animation you have never seen before. The random-image-engine creates a loooooooooooooong funny cursor trail out of a set of images. Add as many images as you like. Easy configuration and installation. Crossbrowser.

## TEST SCRIPT

Wait until this page has been loaded. Then move your cursor around the webpage until the animation stops and all images disappear.

## CONFIGURATION

### Step 1

Open your webpage. Copy the following code and paste it right below the `<body>`-tag of your webpage.

select code

```
<script>
// CREDITS:
// Splash Tracker
// By Urs Dudli and Peter Gehrig
```

### Step 2

Go to the top of the script-code and configure the URLs and the number of your images as well as the speed of the animation.

### Step 3

Have fun!
