

This company produces 3 plugins for Photoshop, now all in version 2: Type Caster, Terrazzo, Paint Alchemy (all bundled under the name Total Xaos), and Segmentation.

Terrazzo

Clearly the most original, this one works by taking parts of an image and multiplying it in a pattern so it looks like a kaleidoscopic image, thus creating fantastic patterns.

After having played with it for a while, you discover it is a great and very creative idea, but as usual with Xaostools, using it is made difficult by a nice interface but a small preview window. In the end, this makes for a good idea, but not totally usable (version 3 on the way ?)

Usefulness :

GUI :
