

General parameters

Variable bitrate mode: 1-pass

Performance/quality: Slowest

Output video bitstream at 780 kilobit/second
0 kbps 6000 kbps

Maximum key frame interval: 300 frames

☐ Max CPU usage: 100 % ☐ Deinterlace

Decoding parameters

Default postprocessing level: 

1-pass encoding parameters

Maximum quantizer: 12

Minimum quantizer: 2

Rate control averaging period, frames: 2000

Rate control reaction period, frames: 10

Rate control down/up reaction: 20

Quality-based encoding parameters

Encoding quality:  85%

Two-pass encoding parameters

Log file: c:\divx.log Frame dropping:  0%
