Shade of Grey
The official UK hosting
service

What is Greymatter?

Greymatter is the original—and still the world's most popular—opensource weblogging and journal software. With fully-integrated comments, searching, file uploading and image handling, completely customisable output through dozens of templates and variables, multiple author support, and many other features, Greymatter remains the weblog/journal program of choice for tens of thousands of people around the world.

Where can I download it?

The following mirrors are currently available for the latest version (1.21c):

- <http://ijsm.org/greymatter/>
- <http://foshdawq.net/gm/>
- <http://ryannet.org/gm/>
- <http://ultimateinsult.net/greymatter.html>

What about support?

The discussion forum for Greymatter has been [moved here](#) to a new home. Please send all support questions and other Greymatter-related comments or concerns ONLY to this forum—thanks.

How much does it cost? And how can I give something back?
