Scan now

Click this button to start scanning the sections defined in the list at the left. Expand the drives-node to select/deselect single drives to scan. Your settings will be remembered for your next session.

Backups

Restore backup..

Manage, restore or delete formerly created backups using this option. You can change the backup folder in the configuration menu.

Configuration

Customize Ad-aware

This button brings up a new window where you can set additional properties and manage your exclude list, define paths and safety options.
