### Window Pop-Up Generator Notes:

- The resulting function is called "launch()", and can be called using a link, or through another Javascript function. Here is an example of how activate the window using an HREF link:

```
<a href="javascript:launch()" ">Launch Window</a>
```

- If you enter a global URL, remember to add the "http://" before it.

<b>Window Variable Name</b> The window's opening variable. If you don't plan to target the window using JavaScript at a later point, just enter any name.	<input type="text"/>	<b>Resizable</b> Will the new window be resizable by the user?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
<b>Window URL</b> The URL of the new window. If you plan to 'fill' the window with document.write's using JavaScript at a later point, leave this blank.	<input type="text"/>	<b>Scrollbars</b> Will the new window have Scrollbars?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
<b>Window Name</b> The new window's name.	<input type="text"/>	<b>Menubar</b> Will the new window have a Menubar?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
<b>Window Width</b> The new window's width, in pixels.	<input type="text"/>	<b>Toolbar</b> Will the new window have a Toolbar?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
<b>Window Height</b> The new window's height, in pixels.	<input type="text"/>	<b>Status</b> Will the new window have a Statusbar?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
<b>From Top</b> The new window's distance, in pixels, from the top of the screen.	<input type="text"/>	<b>Location</b> Will the new window have a Location (URL) area?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
<b>From Left</b> The new window's distance, in pixels, from the left of the screen.	<input type="text"/>	<input type="button" value="Create Code"/>	

The resulting code is the function that will pop up the window:
