Identifying Your Intel® Chipset

This page contains different methods to help you try to identify the Intel® chipset that is located on your motherboard. The chipset located on your motherboard may or may not be manufactured by Intel. The information located on this page will only help identify chipsets that are manufactured by Intel.

Note: All the methods listed below provide different ways to determine which Intel chipset you might have. You **only need to select one** of the following methods.

Intel® Chipset Identification Software

The Intel® Chipset Identification Utility provides an easy way to identify the specific Intel chipset that is located on your motherboard.
