

# competition

This month, one lucky reader will win a high-performance 200MMX PC from Eagle Systems, and a dozen runners-up can look forward to exploring the world with the WWF Interactive World Atlas from Attica, plus an environment-friendly T-shirt

**W**e're predicting a big response to this month's competition, with its first prize of a valuable, high-performance computer from Eagle Systems. For our runners-up, there are environmentally-aware WWF interactive atlases from Attica, together with cuddly T-shirts.

## First prize

This month's superb first prize is a top-of-the-range PC from Widnes-based Eagle Systems, a small but rapidly expanding company. The PC is fuelled by a power-packed 200MMX processor and that, together with a generous 32Mb of RAM, means it won't run out of steam for a long time to come.

As you'd expect, there are full multimedia capabilities, including a highly-respected ATI 3D graphics card, a 12-speed CD-ROM drive and a 16-bit sound card with a pair of 80W speakers.

Despite its big specification – which also includes a 1.6Gb hard disk – the Eagle's midi tower case will nonetheless fit neatly under the desk, leaving you plenty of space to work and enjoy the 15in monitor.

Win this PC and any games, educational or business software that you have will run like a dream, so pick up your pen right now.

## Runners-up

No fewer than 12 runners-up this month will receive the WWF Interactive World Atlas, which received a very favourable review in our April issue. Produced by Attica in conjunction with WWF-UK, it not only has excellent maps, with just the right amount of detail, it also has a whole host of useful information.

There's a multilingual glossary of geographical terms and a fascinating section about the world's flags and the myths associated with them. There's also a bank of

environmental facts and pictures, courtesy of WWF, that can be accessed via menu options or through media pins linking the words, pictures and videos to specific locations.

And, as well as boning up on environmental facts and figures, the lucky runners-up can wrap themselves up in an environmentally friendly WWF T-shirt.

## How to win

Simply answer these three questions and complete the tie-breaker that follows.

1. What sort of processor does the Eagle Systems PC have?
2. How much RAM is supplied on the Eagle PC?
3. In which issue did we review the WWF Interactive World Atlas?

## Tie-breaker

I'm preying for an Eagle because...
