

# WHAT PC? AND SOFTWARE

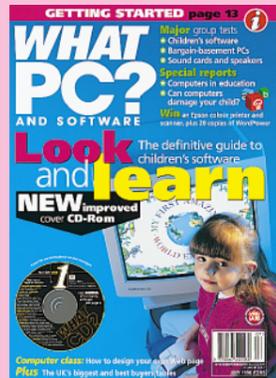

## Cover CD

### 4 What CD? number one

Our fully-interactive cover CD is now better than ever. Each month, you'll find the latest games and multimedia demos; Internet pages galore; our new interactive Getting Started guide to PCs; a resources section filled with essential shareware and utilities; music, photos and poetry in the arts section; plus a 12-month back-issues index of *What PC?*, the complete previous issue of the magazine to read on disc; and much, much more.

## Cover story

### 66 Children's software

A personal computer can open up a world of knowledge for your children – and, through gameplay and interactive stories, learning will be fun as well as factual. We take a look at the vast array of educational software designed to captivate and concentrate the minds of children of all ages.

## Features

### 88 Bargain-basement PCs

Multimedia systems that meet the requirements of everybody in the family needn't cost the earth. We review seven, costing between £900 and £1,300.

### 108 Sound cards

Whether it's grunts and groans from a gory game or the sophisticated strains of an orchestra, the quality of sound depends on your sound card. We test ten cards.

### 122 Speakers

You've sorted out the sound card but, to do it justice, you'll need a decent set of speakers. We sample the sound emanating from eleven speaker systems.

### 139 Computers and your child's health

Children can be faced with violence and problems of addiction through the software they use on their PC. We report on the possible health risks associated with computer games.

### 147 Computers in education

An understanding of technology and the ability to use it are essential to your child's education. We investigate how computers are being used in schools.

## Reviews

### 23 Up front

- Viglen Genie PCI Executive P5/200** 200MHz Pentium PC.
