WIN

This month, our first prizewinner will be one of the first people in the UK to own a Stylus Color 600 inkjet printer, incorporating the very latest in inkjet imaging technology. Our second prizewinner will receive a Stylus Color 400 printer and fifteen runners-up will be able to get creative with QuickCards from Connectix

WIN

How to win

Simply answer these three questions and complete the tie-breaker.

1. What technology does Epson use to produce small, accurate inkdots?
2. Up to what resolution does the Epson Stylus Color 600 print?
3. How can you send a QuickCards card?

Tie-breaker

An Epson Stylus Color printer would brighten up my life because...

The very latest in Epson's colour printing technology is lined up for two lucky prizewinners this month in the shape of the Stylus Color 600 and 400 models, while 15 runners-up can escape the hassle of greetings card shops with QuickCards from Connectix.

First prize

Epson has long been established as a leader in the printer field and has now launched its new Stylus Color range of printers. Our first prizewinner will be one of the first people in the country to own a Stylus Color 600, which is ideal both for home and business users. Incorporating Epson's Perfect Picture Imaging System, it can print vibrant photoreal images as well as true black for crisp, laser-sharp text. With Epson Micro Piezo technology for small, accurate inkdots and Epson AcuPhoto halftoning technology for accurate colours and smooth gradations, the 600 prints at up to 1,440 dots per inch (dpi). It's not slow, either, producing up to four pages per minute in colour, and six in mono.

Second prize

Another fabulous colour inkjet printer is this month's second prize. The Epson Stylus Color 400 incorporates many of the same features as its big brother, the 600. With photoreal printing at 720dpi on plain paper it's ideal for printing letters, T-shirt transfers, party invitations and much more.

Runners-up

For 15 runners-up, we've got QuickCards CD-ROMs from Connectix, a package that will do away with the stress of finding birthday and other occasion cards. With QuickCards, you can create a personalised multimedia card that you can then send by e-mail or on disk through the post. The finished product will run under Windows 3.1x/95 or on a Mac.
