Acrobat Reader uses indexes to perform searches on documents. On the CD there are two indexes:
 - **<cd drive>:\ACROFILE\GLOBAL.PDX** (Personal Computer World Hands On)
 - **<cd drive>:\ACROFILE\LASTWPC\WPCmmyy.PDX** (What PC? mm = month, yy= year)

To use searching successfully and to avoid irrelevant results you will need to ensure that the correct indexes are selected.

From any document click on the Search Button

From the Search Dialogue click the INDEX button and select or deselect the index files accordingly.
