Finger Client Main Screen

The Finger protocol is a simple Internet protocol that follows the client/server model. The Finger client will also be then, a simple application. The client will make a connection to a Finger server, will send the command, will wait for the response, and will display it in the screen.

The Finger client main screen can be divided in two parts: The first one includes the menu, the action indicator and the buttons bar, while the second one includes the text box where the information will be displayed. There are 4 menus:

Register

   Shuttle FTP Suite is a Shareware program. This means that if you like it after you have tried it or you are going to use it for commercial purposes, you must **register it**. I have put a lot of hard work to develop this Internet multi client, and I need money to continue developing new versions of this program. Registering a shareware program will make you a happier person and will increase your spirit because you will be doing the right thing.

   There are two ways of registering Shuttle FTP Suite:

   a.-) Online Registration via Internet. You can visit Shuttle FTP Suite website at http://www.waveflow.com/shuttleftp/ and follow the instructions, or you can directly select   Help Menu   Register   Online Registration.

   b.-) Sending a letter with the money (a little fee of 25 US$) and the Registration Form to:

   Xavier Cirac
   c\ Batlles , 4
   Premia de Mar , 08330
   Barcelona
   SPAIN

   After receiving your registration mail, I will e-mail/mail you with your registration login and password so you can enter them to the program.

   If you need multiple licenses of Shuttle FTP Suite, you will have a very special discounts:

   1 license: 25 US$
   5-10 licenses : 23 US$ (8%)
   10-15 licenses: 21 US$ (16%)
   >15 licenses: 18 US$ (28%)

   Thanks for registering Shuttle FTP Suite.

   Registration Form

Registration Form

Contents: Displays this help file.
Register: Gives you information about the program registration.
About...: General Information of the program.
Visit Shuttle FTP Suite website: Direct connection to the Shuttle FTP Suite Web Site, where you can find and download the last version and find some information about it.

Finger Client

The Finger Client is a simple client that displays the response of a Finger server, which is usually information about a user of its system. You can connect to a Finger server using either the Quick Connection or the Finger Site Manager option. If the command sent is null (no user name is sent), the Finger server will answer with all the users connected to its system,

Finger Site Manager

This option shows a Finger server manager, that lets you order the servers in a tree mode using folders and servers, and letting you add/delete, and change servers and information about them. The information that can be saved in this form is Host Name, Host address, Port, User to Finger (command) and Comments. Of course, you can establish a connection to any of the Finger servers that you enter in this Site manager.

Quick Finger

Besides the <u>Finger site manager</u>, another option is available to establish a connection to a Finger server. This is the Quick Connection, and it displays a form where the connection information has to be entered (Host Address and Command).

Cancel Current Finger

This option closes the connection (cancels it).

Close

This option closes the Finger Client Window closing the current connection if applicable.

Finger Menu

This menu includes all the functions related to the Finger connections and protocol. They are:

Finger Site Manager
Quick Finger
Cancel Current Finger
Last Hosts Visited
Close

Edit Menu

    This menu includes some functions related to the edition of the contents of the server response displayed in the screen. These functions are:

Copy
Select All
Clear

Copy

This option copies the selected text part of the server response to the Windows Wallpaper so the user can use it in other applications.

Select All

This option selects all the text displayed in the screen (sent by the server).

Clear

This option clears the screen contents.

Miscellaneous Menu

This menu includes some general functions of the Finger client. They are:

Print
Set Finger Port

Print

This option prints the contents of the screen (the server response).

Set Finger Port

This options sets up the value of the finger port used by the program. The default finger port is 79.

Last Hosts Visited

This option includes a submenu where the address of the last Finger servers (hosts) visited is displayed. A connection to any of them can be made just selecting it.
