

Congratulations! You are using

The SaltMine Serial Reader™

brought to you by Saltminer & Passenger. you probably obtained this application as part of the Surfers BlackBook monthly distribution.

getting started...

1. launch the SaltMine Reader
2. type in the name (full or partial) of the application you like to find on the edit field located on the top left corner
3. click the "Filter" button
4. select the application by clicking on the name
5. select the version from the popup menu
6. double click on the number
7. now, you can toggle between large and small windows by clicking on "Shrink" and "Expand" buttons. knock yourself out!

shrink button: hide everything except the *scrap box*; also auto position the window to the top left corner for easy entry.

application filter: narrows the application search; enter the partial name and click to filter

scrap box: temporary data storage; data can be copied here by double-clicking the number entry.

version menu: select a version

content tabs: switch between the different types of information

URL: launch the selected URL in your default browser or copy it to the clipboard.

copy **launch**

expand button: restore full window
