DE►BABELIZER®
THE GRAPHICS PROCESSING TOOLBOX™

DeBabelizer Toolbox is a graphics application used in conjunction with digital creation tools such as Adobe Photoshop, Macromedia Director, Fractal Design Painter and 3D Studio. An indispensable application for professional designers, DeBabelizer does what no other program can— it fully automates and takes the tedium out of graphics production. DeBabelizer translates RGB bit-mapped images between cross-platform graphics and animation formats with integrity. It lets you edit or manipulate them at will, then saves the work to the file format that you desire.

DeBabelizer provides you with a wealth of graphics editing tools, unrivaled color reduction, intricate palette manipulation, limitless internal scripting options and the ability to batch process a series of images with the touch of a button. Once it's set, DeBabelizer runs itself. It is like having a staff of production assistants at your fingertips.

Here is why DeBabelizer Toolbox is the number one choice of top graphics professionals:

WEB PUBLISHERS

Some of DeBabelizer's awards and ratings

- **Automatically converts** graphic assets to GIF (interlaced, with or without transparency), JPEG, progressive JPEG or PNG
- **The only program** that automatically creates the optimal palette for your entire web site
- **The absolute best color reduction** to any bit-depth
- **Eliminates palette shift**
- **Conserves bandwidth**
- **DeBabelizer ProScripts**™ automatically prepare graphics and optimize palettes for the Web

"We use DeBabelizer for literally every image that we put on the Web." -Jeff Veen, Hot Wired

GRAPHIC ARTS/ PHOTO IMAGING

- **Removes background;** automatically replaces a range of colors with a single background color
- **Composites images** using alpha channel or background color as transparency
- **Batch catalogs automatically;** thumbnails or original size
- **Supports Photoshop**-compatible Acquire, Export and Filter plug-ins to apply to a batch of images
- **Recognizes and Opens** any of over 70 cross platform graphic formats even without the correct extension
- **Translates an entire batch** of images automatically for use in any compatible graphics program

"DeBabelizer is a godsend for anyone who needs to work with lots of scans, downloaded images, and the like. It can convert a file to one of 70 graphics formats, reduce the color depth, adjust the palette and more, using a variety of options." - Macworld magazine

MULTIMEDIA/ ANIMATION

- **Flattens QuickTime™ movies** for playback on QuickTime for Windows
- **Translates QuickTime movies** into a file of sequentially numbered stills
- **Animates a series of stills** into QuickTime movies
- **Creates the optimal palette** automatically for any series of images
- **Translates graphics formats** between Mac, DOS/Windows, SGI, Sun and more
- **Interpolates filters;** automatically applies filter effects progressively over a series of images
- **Reports and displays** differences between images or a series of images/frames
- **Trims animation files** only to the area that changes occur between frames
- **Sets color** of identical pixels
- **Sets alpha channel** of identical pixels to a specific color

"Many multimedia developers say DeBabelizer is the one tool they couldn't live without. With the ability to convert between virtually all image file formats, as well as batch-file and palette-optimization features, DeBabelizer truly lives up to its name." -New Media magazine

DESKTOP PUBLISHING

- **Acquire from any Photoshop-compatible scanner** and process to specifications
- **Batch catalog images;** thumbnails or original size
- **Corrects** image display using ColorSync 2.0
- **Adjusts** image resolution automatically
- **Manipulates palettes**
- **Translates files** across multiple platforms

"We've used DeBabelizer's scripting techniques to Macintize palettes, reduce bit depth, remove duplicate colors and set standard resolutions. The batch file capability is extremely useful, it's a lot easier than doing it one at a time." -Robert Kanes, PC World magazine

VIDEO / INTERACTIVE TV

- **Adjusts RGB value** to PAL or NTSC automatically
- **Removes background** automatically for superior blue screening
- **Field interpolation** eliminates motion blur
- **Supports Abekas and QuickTime** file formats

"DeBabelizer is absolutely essential. If you have a Mac, you need this software; if you don't have a Mac, you need to get one so you can use this software." -TV Technology magazine
