

## Description of Extractlcon

The program **Extractlcon** is intended for scanning the directories and extracting icons from files of various types.

The program Extractlcon has the following features:

- Scanning is carried out both in the directories and in subdirectories.
- Scanning files is possible both on the given extension and all files in succession. The extensions of files can be combined.
- Saving extracted icons in formats ICO and BMP. At saving an icon the name of a file is saved automatically.
- Converting files ICO into BMP format.
- Viewing through extracted icons is possible in modes LargeIcon and List.
- Copying found icons into the clipboard and subsequent insert into any program.
- Display of the selected directory and masks of search on the main screen.
- The number of found icons is shown.
- While choosing any found icon in the status line, the path, and the name of a file from which it was extracted are displayed, besides, the icon is drawn in a special window.
- Possibility to choose the screen color of extracted icons.
- All the changes you make are saved and restored with the next program starting.

## Introduction

The program consists of two parts: converting files ICO into format BMP (first part) and scanning files for extraction of icons (second part).

These two buttons concern the first part of the program:

- Look for details [Main menu](#).

All the other settings concern the second part of the program:

- **"Select Dir"**. The button of choosing the directory, where scanning and extracting of icons will be carried out. If there is a tick opposite **"Search in SubDirectories"** search will be made also in subdirectories.

- **"Scan/Stop"**. Buttons to begin scanning and stop.

- **"View"**. Looking through icons in the following way: LargeIcon and List.

- **"Icon view"**. On this panel current extracted icon, or one selected from the list of extracted icons is displayed.

- **"Clear List"**. Clearing of the list of extracted icons.

- **"Search in.."**. On this panel the selected directory is shown, where scanning files is carried out.

- **"Mask"**. On the panel the list of extensions of files is displayed, according to which the search and extraction of icons will be carried out. To set extension is possible in a [window of settings](#).

- **"Color of a background"**. By pressing this button, you can set color of the screen, where extracted icons are displayed.

In the bottom part of the program there is the status line:

In the first part of the status line the number of extracted icons is shown. In the second part - mode of operations. In the third part of the status line the name of a file is shown, from which icons are extracted and the path to it.

The window of settings

## Main menu

The panel of the main menu looks as follows:

On the panel there are following buttons:

- **"Open file"**. The button of opening a file ICO (\*.ico) for transformation into format BMP (\*.bmp).

- **"Conversion"**. The button of converting a file ICO. By pressing this button a file is converted and the window offering to save the transformed file opens.

- **"Settings"**. A call of settings of the given program. Look for details [the window of settings](#).

- **"Registration"**. The button of opening the registration window of the program. After correct registration this button disappears from the panel, (look for details [registration](#)).

- **"Help"**. Call of the Help system. A very useful button.

- **"About.."**. The button of opening the window with the information on the authors and version of the program.

- **"Exit"**. By pressing the button the program is closed, saving all the data.

## The window of settings

The window of settings consists of two sections.

### The first section

-represents the list of extensions of files. Extracting icons will be made only among those files, which extensions were marked. For example, you have chosen the following types of files: EXE, DLL, VBX. During scanning and extracting icons only files with these extensions will be viewed.

The buttons **"Select All"** and **"UnSelect"** serve for your convenience and select /unselect all specified types of files.

### Second section

- consists of the switch **"\*.\* - All Files"**. Choosing it, icons will be extracted from files with any extensions.

## PopUp Menu

The PopUp menu occurs while choosing an icon from the list of extracted icons, and looks as follows:

**"Save as \*.ico"** - save selected icon in ICO format.

**"Save as \*.bmp"** - save selected icon in BMP format.

**"Copy"** - copy a selected icon into the clipboard.
