

Here's your invite to the "Worms World Party", Team17's latest turn-based gift in which worms battle across zany custom or randomly-generated landscapes. With "Worms" already having a reputation for being a party animal, there is just no reason not to come!

★ Show your invite to the doorman to gain access to fantastic new game-play modes including **WORMPOT** which allows access to over 1000 different game-styles. All modes are available offline, online or a mixture of both!

★ Mingle with over 20 multiplayer missions: players can now team up with a buddy to tackle co-operative missions where working together is the only way to win. Alternatively check out the competitive missions and fight in specially prepared scenarios, which are unlike any match you've ever played before.

★ Single player and multiplayer, 2-6 players either around one PC or on-line.

★ Do battle online: so if you can't make it to the party you can always join the fun via the Worms network. There's just no need to be on your own tonight.

★ It's a veritable feast with 60 weapons, ranging from the relatively calorie-free bazooka to the full-fat concrete donkey. Oh Man!

★ Our DJ informs us his record box is just bursting with over 40 single player missions and there are dozens of custom landscapes which can be requested and played at anytime.

★ If you're new to the party scene don't worry, our friendly training section will soon have you dancing with the rest of us.

★ Plus there's the Editor. Oh Yes! Which means you can create your own cocktail of missions and training levels and swap them with your buddies.

So ladies and gentlemen, let's gather round and toast to a "Worms World Party". Cheers!
