––––––––––––––––––––––––––––

Master the Facts Multiplication is a no-nonsense drill and practice program to aide students in learning multiplication facts. This program was created in response to teachers requesting a "non-game" software tool to use in their classrooms to teach multiplication.

The freely distributable version of Master the Facts Multiplication should be considered trial-ware. It gives you a chance to try out the Master the Facts Multiplication program, but you will be limited in that only the numbers 1-5 can be used as the initial factor and rounds are limited to 10 questions maximum. However, you can purchase a registration code that once entered into the program will allow you to select numbers 1-9 or random as the initial factor, and you will be able to select rounds of lengths 10-100 questions.

SYSTEM REQUIREMENTS

Mac OS Version: Mac OS X or higher.
A version for Mac OS 8.1-9.1 can be downloaded from our web site at
http://fastrabbitsoftware.com/mtfmult.htm

What's new in this version?

Now runs native under Mac OS X.

REGISTER

What is covered in a single user license? You may install and use Master the Facts Multiplication for Mac OS X on all computers in a single classroom or home. Please purchase a site license if the program will be used in the school lab or in multiple classrooms. Purchase the district license if the program will be used in multiple schools in your district. Please do not share your registration code information. The fees I receive are used to help fund development of this and other shareware titles.
