

**#32 Using local variables with RECEIVE PACKET**

Written by Todd Carper

Published Date December 14, 1987

---

Don't use local variables with RECEIVE PACKET.

---

When using the **RECEIVE PACKET** command, do not specify a local variable for the *strvar* used in the command. **RECEIVE PACKET** will only receive data into global variables.

Valid:

**RECEIVE PACKET(myvar;5)**

Not Valid:

**RECEIVE PACKET(\$myvar;5)**
