---

Using the **GRAPH** command with variables.

---

When using **GRAPH**(*var;posintexpr;strvarX[subfieldnameX;numvarY[subfieldnameY]*) the variable names used for *strvarX* and *numvarY* must not exceed 8 characters.

Valid:

**GRAPH**(MyGraph;1;MyLabel;YourData)

Not Valid:

**GRAPH**(MyGraph;1;YourLabel;TheirData)

Where MyLabel, YourData, YourLabel, and TheirData are variables.
