

Q: When I use the Action Cell method `setAlignment:` in conjunction with the Cell method `setScrollable:`, I experience some inconsistent behavior. If I have called `[myTextCell setAlignment:NX_CENTERED]` and `[myTextCell setScrollable:YES]`, the display does not update in the cell. However, when the TextFieldCell is sent `[myTextCell setScrollable:NO]`, then the display works fine.

A: The Text Object does not support scrolling for centered or right-justified text. To get proper display, you have to disable scrolling with `[myTextCell setScrollable:NO]` when using the method `setAlignment:` with the values `NX_CENTERED` or `NX_RIGHTALIGNED`. If your text is left-justified, scrolling will work fine, i.e. you can use `[myTextCell setAlignment:NX_LEFTALIGNED]` with `[myTextCell setScrollable:YES]`.

Valid for 1.0, 2.0, 3.0
