# NSDPSContextNotification

**Adopted By:** no OpenStep classes

**Declared In:** AppKit/NSDPSContext.h

## Protocol Description

The NSDPSContextNotification protocol supplies information about the execution status of a sequence of PostScript commands previously sent to the Display PostScript server.

## Instance Methods

### **contextFinishedExecuting:**

– (void)**contextFinishedExecuting:**(NSDPSContext \*)*context*

Notifies the receiver that the context has finished executing a batch of PostScript commands. See **notifyObjectWhenFinishedExecuting:** (NSDPSContext).
