**Multiplayer:** Split screen  
**Release Date:** September '99  
**Update:** 8.7.99

## Background

The eagerly awaited addition to the double award winning **Carmageddon™** series is on its way. **Carmageddon 64™**, developed especially for the N64™, takes driving games to the ultimate extreme. If it's motorised mayhem you're after, **Carmageddon 64™** is the place to get it.

## The Game

The year is 2026 and fatal toxins have polluted the earth's atmosphere. Those humans lucky enough to get to the 'Climate Emulation Centers' in time, live in fear of the souls left on the surface- mutated, blood-thirsty zombies - the "undead". The World Government has recruited drivers to deal with this problem. It's called '**The Carmageddon™**', a death race in which drivers' race against each other for the ultimate prize: a new life in the sun-drenched beaches of the off-world colonies. As well as a way of dealing with the zombies, it provides entertainment for the dwindling human population. You take on this challenge as Max Damage, a psychotic, cold-blooded killing machine. There is no second place – just life or death. Drive to survive and let nothing and no one get in your way.

**Carmageddon 64™**... a crash course in survival.

\*Best Driving Game of the Year– PC Zone Reader Awards 1997, 1998

## Features
