The Fastest Mac Ever

Power Macintosh G3

“If you have been waiting for the right time to purchase a Power Mac, carpe diem. . . . It has the features and upgradability to keep users happy well into the next millennium.”

— InfoWorld

1999

More brain. Less brawn.

PowerPC

PowerPC Roadmap

Superior Chip Design

	G4	P-III
Transistors	10.5M	9.5M
Die size	83 mm²	130 mm²
Power	<12 watts	40 watts

Next Generation PowerPC

- Dramatically improved memory interface
 - Pre-fetching
 - Streaming
 - 3x bandwidth
 - Faster access

Next Generation PowerPC

No-Compromise Architectural Extensions

- 4-state MP-optimized cache architecture
- Specially designed for media and DSP applications

AltiVec

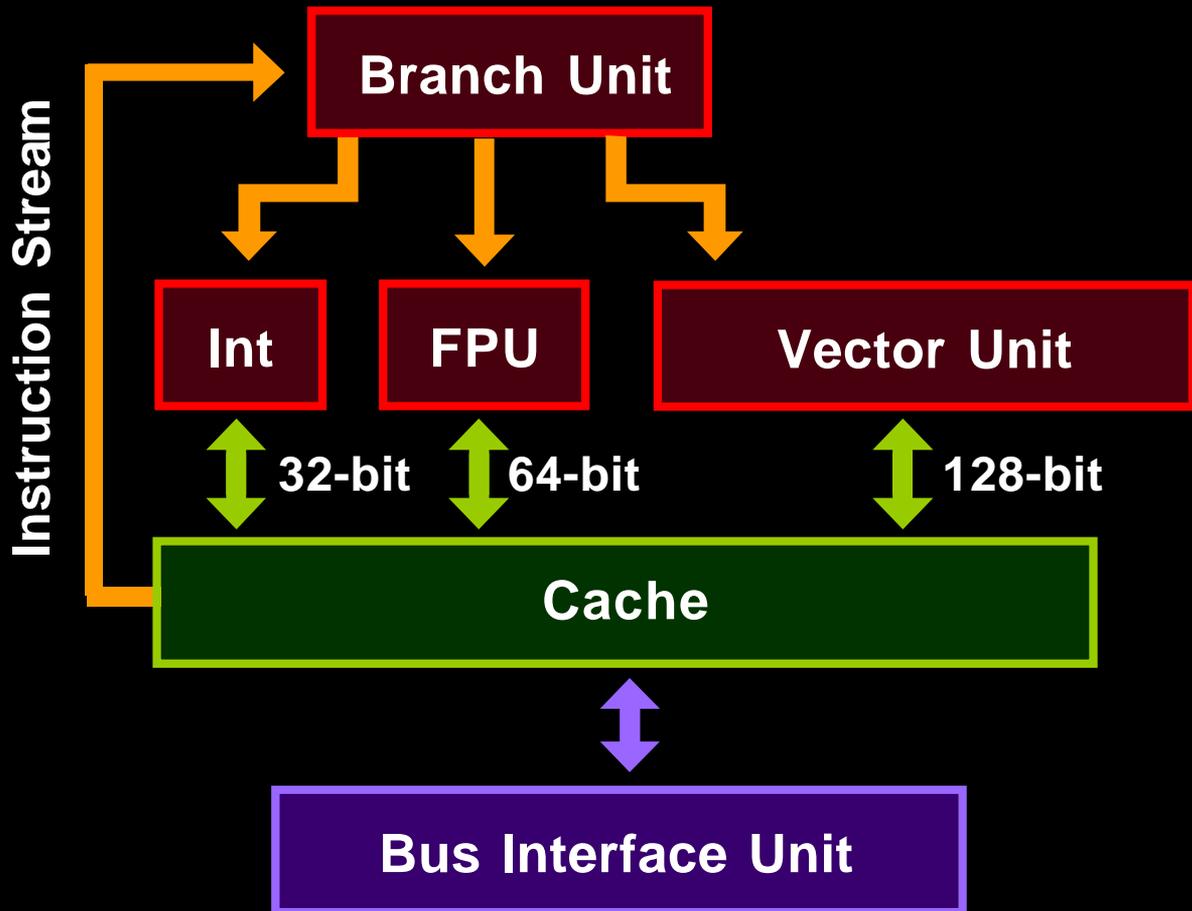

Vector Processing in a Macintosh

- 128-bit architectural extension
- 32 new registers and 162 new instructions for SIMD processing
- Designed for processor-intensive programs

Multimedia, graphics, 3D,
DSP, sound/music, matrix
and vector computations

AltiVec Architecture

G4 Altivec vs. P-III SSE

- Richer instruction set
- True streaming support
- More advanced instruction handling

Independent units —
no mode switching,
concurrent computation

More registers

- Maintains simplicity of RISC

G4 vs. G3 Performance

Maxon Perspective Shading	3x
Photoshop	
Rotate CW90	1.6x
Gaussian Blur 1	2x
Gaussian Blur	1.5x
Unsharp Mask	1.6x
Media 100 Audio Processing	4x
Code 32 tap 1024 Dimension FIR filter (bfir)	8x
Mac OS Block Move	1.5x

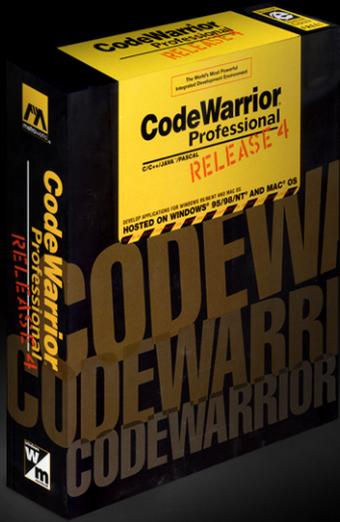

AltiVec

What Apple Is Doing

- OS integration — transparent app support
OS 8.6 and OS X will support AltiVec
Core graphics routines: QD, QT, OpenGL
- Core libraries for developer use

AltiVec for Developers

- AltiVec SDK available now
developer.apple.com/hardware/altivec
- C-based programming model
- CodeWarrior supports AltiVec
- Kitchens, technical support available now

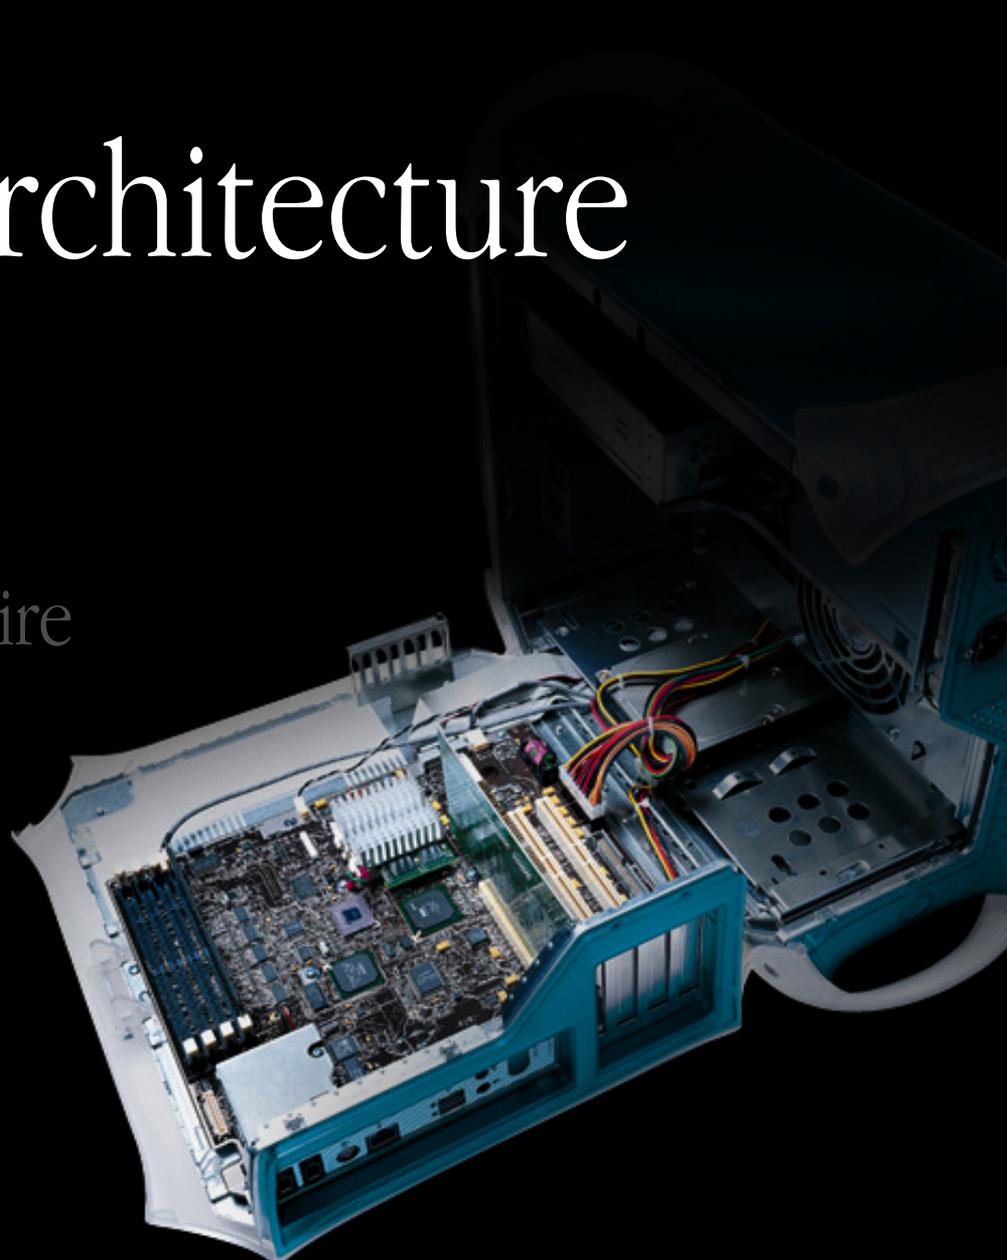

AltiVec Opportunities

- Processor-intensive or large data sets
 - Audio & video decode / encode
 - Image processing filters
 - Scientific calculations
 - Table look-ups
 - Data encryption / key generation
 - Speech processing & handwriting analysis

Unified Architecture

- PowerPC
- Subsystems
- USB & FireWire

Subsystem Architecture

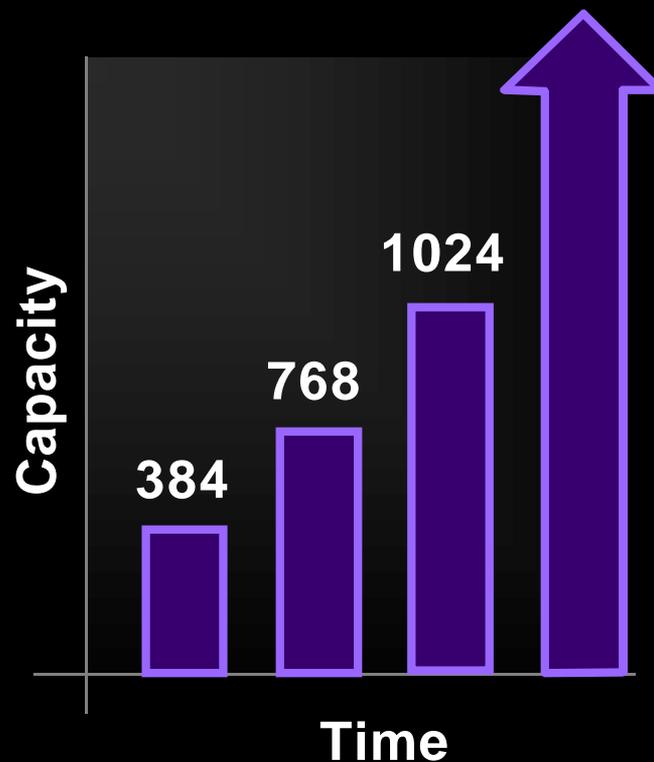

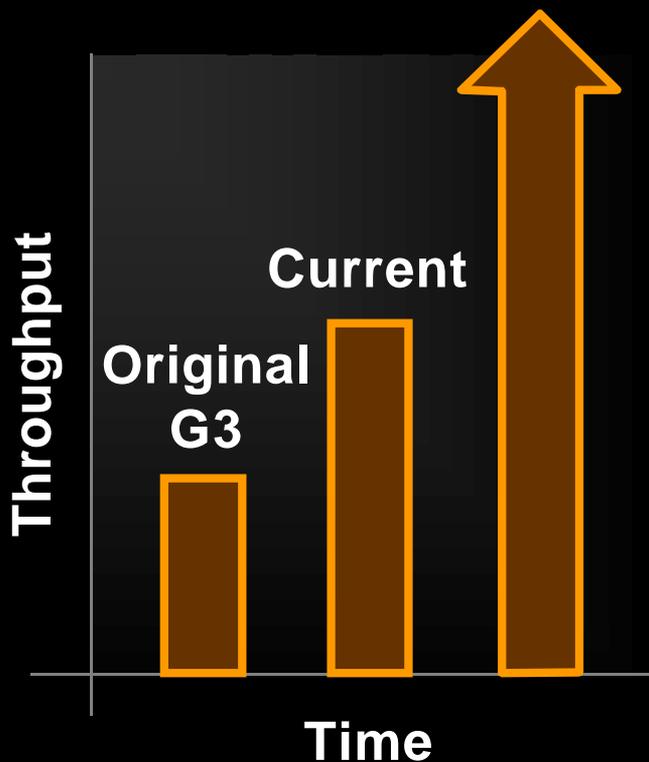

99

Worldwide
Developers
Conference

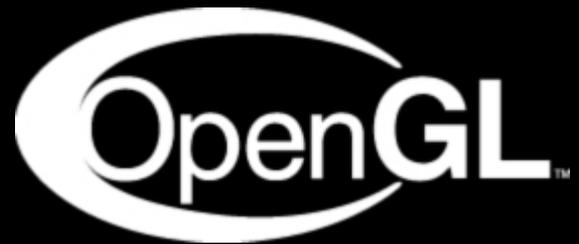

System ROM

- Reliability and compatibility
- Fast revisions and updates
- Simplifies developer support of CPUs

Memory

Graphics

Audio

- Migration to Digital
- FireWire and USB for external connects
- Enhancement technologies
 - 3D positional sound
 - Multi-channel virtual surround sound
 - Bass enhancement

Power Management

- More consistent — not just for portables
- More sophisticated — Wake on LAN
- More robust — turn off subsystems, including PCI, USB, FireWire
- More to come — 8.6 is just the beginning
- Follow Power Manager 2.0 guidelines (Session #209)

PCI

- What developers should do
 - Update drivers to take advantage of new Power Manager architecture
 - Provide Open Firmware 3.0-compatible code for boot devices
 - Don't rely on slot names or numbers

Time Manager

Beta
Just Posted

- Now PPC-native
- No longer relies on legacy HW (VIA)
- API calls up to 200x faster
- No longer affects PCI bus performance
Reliable performance for
high-end AV solutions

Drives

ATA Ultra DMA 66
Mainstream

SCSI Ultra 2 LVD
Special-purpose

Ideal for DV, publishing,
image editing

Ideal for multiple drive
RAID, external expansion

20MBps single-drive
sustained R/W

20MBps single-drive
sustained R/W

MLB interface

PCI card

Standard

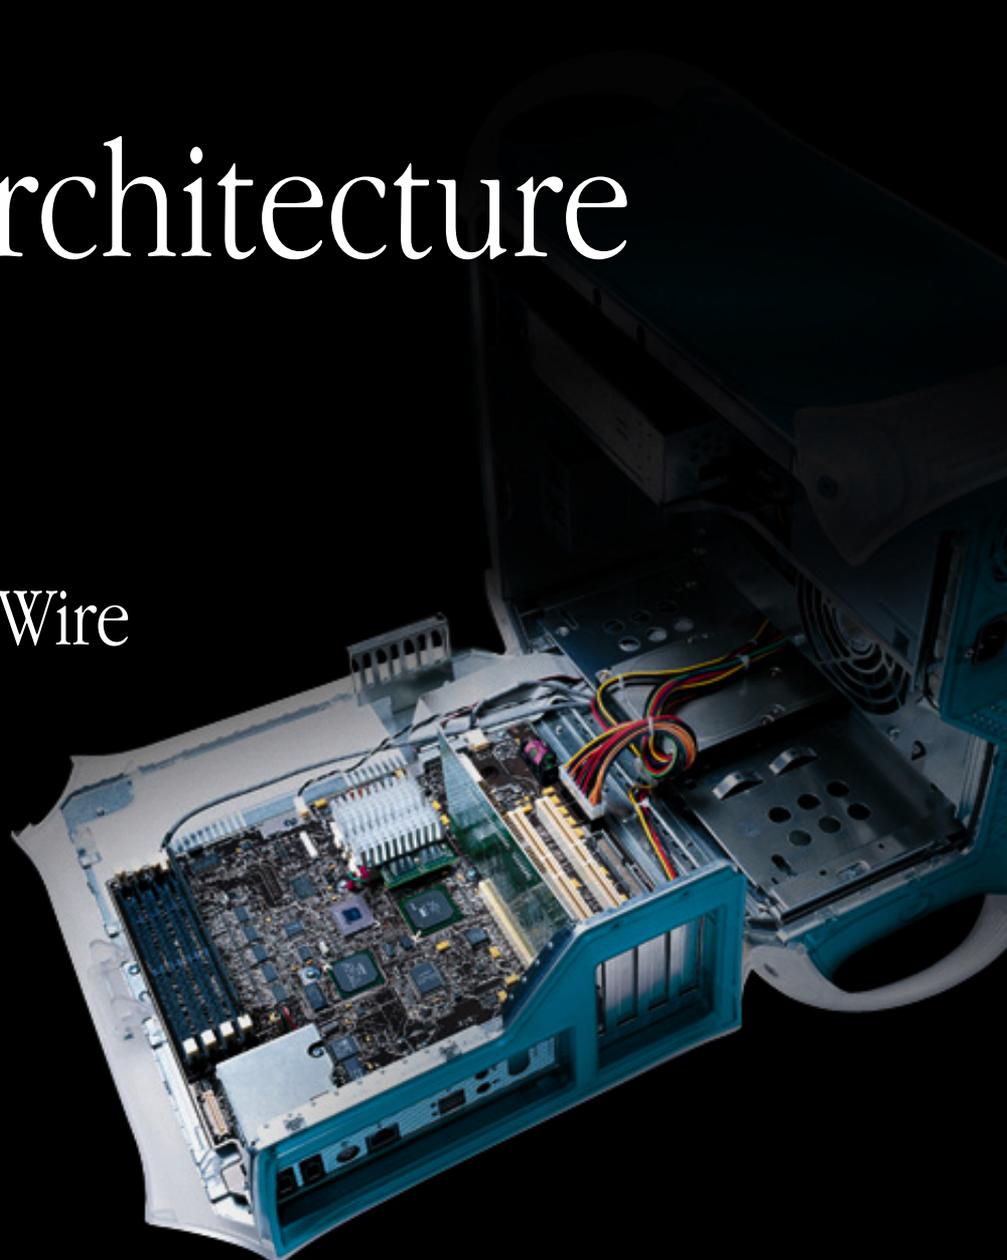

BTO

Removable and External Drives

- No built-in floppy
- More DVD
- Software support for USB and FireWire devices

Unified Architecture

- PowerPC
- Subsystems
- USB and FireWire

Entry and Consumer Peripherals

Multimedia and Pro Peripherals

Up to 12 Mbps

Up to 400 Mbps

127 devices on bus

63 devices on bus

Hot plug / unplug

Hot plug / unplug

Power on bus

Power on bus

Replaces Serial, ADB

Replaces SCSI, Analog AV

Product Lines with USB

New in USB

- In Mac OS 8.6 (USB 1.2)
 - Isochronous and interrupt-out data transfers
 - Complex USB device configurations
 - PostScript printers
 - Mass storage class driver

Just Posted

USB Roadmap

FireWire Hardware

- Standard on Power Macintosh G3, new option for PowerBook G3
- Outstanding developer support!

New in FireWire

- In Mac OS 8.6 (FireWire 2.0)
SBP-2 for hard drives, printers
CMP for multiple cameras
- Coming soon in FireWire 2.1
DV Capture to FW drives
CardBus support

FireWire Roadmap

DV: Format for the Future

- Professional quality at consumer prices
- Pixel-perfect generations

DV	DVCPR050
25Mbps stream	50Mbps stream
4:1:1 sampling	4:2:2 sampling

Design

A close-up photograph of two plastic bottle caps. The top cap is purple and blue, with a white plastic ring and a purple ring. The bottom cap is orange and yellow, also with a white plastic ring. The background is black.

A Sustainable
Advantage?

Color Series Transparent Plastic Cases
