# ARArchive

### 1.1 ARArchive.guide V1.0 by Robert Reiswig ©1995

Short: Frontend for all AR's 1.3.03 (LHA Support)  
Author: rcr@netcom.com (Robert C. Reiswig)  
Uploader: rcr@netcom.com (Robert C. Reiswig)  
Type: docs/mags

ARArchive 1.3.03

Many people keep the back issues of Amiga Reports to reference them once in awhile. ARArchive will make keeping track and accessing all of your Amiga Reports much easier.

ARArchive looks for the UNCOMPRESSED or LHA AR's in AR:  
You can set this by running the installer.

\*\*\* NEW!!! \*\*\*

I recieved about 100 e-mail messages form people asking me to support MANY different Compression methods for ARArchive.

It was hard to pick one but I choose LHA, because that is the format that AR comes in!!!

ARArchive now will unlha, and view your Amiga Reports!!!  
You must be running AREXX to do this!

The installer will now Build 2 files, if you tell it that you Store your ARs' in the LHA format!

It will create 'c:ARA' This is a small AREXX script that will uncompress .. view .. delete/uncompressed .. The selected Amiga Report.

The second thing that will be created by the installer is a dos script that lanuches the AREXX script.

When you get a new Amiga Report all you need to do is unpack it to AR: (if you selected .guide files) or just move the new LHA file to AR: .... thats it!

---

Thanks to Jason Compton for helping me pick the "look" of the frontend, that was the hardest part.

Note: If you tell the installer to assign AR: to Ram Disk:  
then, in a shell or cli, you need to do: "assign AR: ram:"

HELP: I could not get the RX function in AmigaGuide to call an AREXX script then have that call Multiview, when the 1st AmigaGuide is run from an ICON.. This is why ARArchive-LHA calls a dos script that calls The AREXX program...

#### RATINGS FROM AMINET:

(When ARA is there)

The 10 most downloaded files from Aminet during the week until XXXXX
