

# FM7 SOUNDS

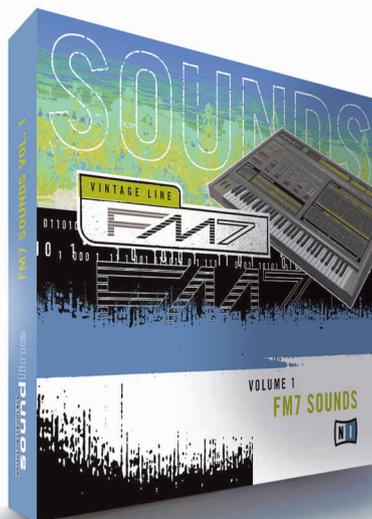

## VOLUME 1

SOUND LINE

Covering the full range of FM possibilities from crystalline pads and powerful percussion to innovative synths and looped sequences, this patch collection perfectly complements the library of sounds already included with the FM7.

All patches are optimized to offer the highest flexibility while playing or performing. Looped sequences can be synced to MIDI clock, pads can be morphed from gentle to crystalline, and percussive sounds can be mutated from aggressive to subtle.

All patches were designed by renowned sound designers and take full advantage of the FM7's formidable synthesis capabilities, including multiple breakpoint envelopes, extensive modulation capabilities, analog-modelled filters, and a comprehensive effects section.

### CONTENT

256 new presets for FM7, Looped sequences, Drum- and Percussion Sounds, Pads, Synth- and Sequencer Sounds

### FEATURES

Wide variety of FM7 sounds

Programmed by renowned sound designers

Designed to take advantage of the FM7's powerful synthesis engine
