

B4 TONEWHEEL SET

VINTAGE COLLECTION

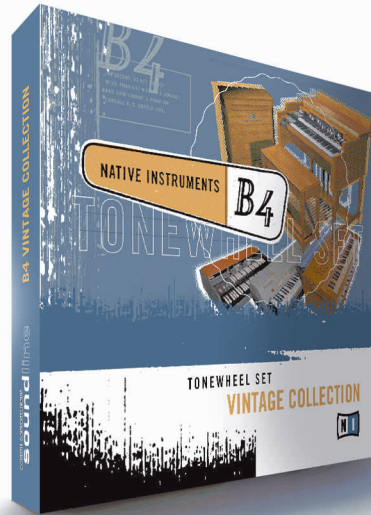

SOUND LINE

B4 Tonewheel Set Replacement

In addition to being absolutely weightless, the Native Instruments B4 has several advantages over the 400 pound B3. For instance, if you want to change the tone of your B3, you would need to hire a specialist to replace the filter capacitors in the tonewheel generator and recalibrate the tone filter circuits. It's a bit easier with the B4 – since every characteristic of the B3 has been painstakingly modelled in software, replacing a whole set of 91 tonewheels is as easy as double-clicking.

With the B4 Tonewheel Set Vintage Collection, you can make your B4 sound like a B3 that is sparkling-fresh from the factory, or like one that is more than 100 years old. You can even replace the B3-modelled tonewheels with those of a classic Vox Continental, the famous Farfisa

Compact, or an Indian Harmonium to give your B4 a totally new character.

CONTENTS

Make your B4 sound like other famous organs:

- Harmonium – one Tonewheel Set of a converted Indian Harmonium
- Vox Continental – three Tonewheel Sets of the classic transistor combo organ
- Farfisa – two Tonewheel Sets with the Tone Booster switched on and off

B4 AGEING – Define your B4's condition:

- B3 classic: well matured
- B3 clean: good condition
- B3 pure: better than on day one
- B3 dirty: excessive ageing
- B3 filthy: very crunchy
- B3 trash: far beyond repair

B4 MASTER TUNE – Change the speed of the master tune of your B4 to 436Hz, 444Hz, 448Hz or 452Hz.
