

C++ WIN32 DEMO COMPILER

This compiler is compatible under both Windows NT and Windows 95

This compiler supports:

- * 32-bit addressing, C/C++ source language with templates and exceptions
- * Microsoft Win32 API
- * Very fast compilation (~100,000 lines per minute on a 66Mhz 486)
- * Needle-sharp compiler-time diagnostics
- * Checking options that trap references through null pointers, undefined variables etc. (see checks.cpp in cwp4demo directory)
- * Local and global optimisation.
- * Built in 32 bit assembler
- * Windows debugger
- * ClearWin+ Windows program development system (see cwhelp-c.hlp file)
- * Plato - Integrated Development Environment
- * SIDE - Integrated Development Environment
