# About Valentine Slots

Valentine Slots is another in a series of seasonal/holiday slot games published by Ultisoft, Inc. Visit the Ultisoft homepage to see the other holiday slot games: Christmas Slots, Halloween Slots, New Year Slots, St Patrick Slots, and Easter Slots.

This is a one payline slot machine game. Up to three coins can be bet on each spin. Winnings are based on the symbols on the payline and the number of coins being bet. There are also several bonus features which make Valentine Slots very fun and also adds an element of skill to the game.

The game will detect the number of colors available and will use either True Color (24-bit) graphics or 256 color (8-bit) graphics depending on your graphics card's capabilities. The game will also adjust to your current resolution and will take up the full screen.

Please send comments, suggestions and bug reports to [support@ultisoft.com](mailto:support@ultisoft.com)

# Keyboard Controls

Besides using your mouse to control the game, you can use your keyboard for betting and for spinning or stopping the reels

To Bet one Coin: Press B

To Bet max Coins: Press M

To Spin: Press the Enter Key or the Space Bar

## Placing Bets

Click the "Bet 1" or "Bet 3" buttons to place your bet. You can also press the "B" or "M" buttons to place bets. Click the "Spin" button to spin (or hit the "Enter" key or "Space Bar"). You can continue to bet the same amount by just spinning.

## Borrowing Credits

Click on the Borrow button to borrow (or repay) credits. A new game starts with 1000 credits which are considered borrowed.

## Payoffs Chart

Click the PAYOFFS menu item within the program to view the payoff chart. The payoff chart lists the amounts won for various winning paylines and bonuses.

Remember that payline winnings are based on one coin bet. If you bet three coins, the payoffs would be tripled.

# Bonuses

## ***Nudges***

Effective use of nudges is the key to beating this game. You can spend a nudge by clicking the flashing "Nudge" box above and of the three slot reels. You can only nudge a reel if you have collected one or more nudges and if the last spin was a losing spin. You cannot nudge after a winning spin. By nudging, you can turn a losing spin into a winning spin. Try to save your nudges for spins which can easily be nudged into a winning spin for a good payoff. (Hint: always nudge a wild symbol because it will give you back your nudge and will cause a winning payline).

You get nudges every time the wild symbol lands on the payline.

## ***Acey Ducey Bonus Game***

When you get three of the Candy Hearts symbols, you go to a special bonus screen. This is a card game in which you decide to bet if you believe that the next card drawn will be between two cards already showing. The third card must be between the two cards--not equal to either of them. If the third card is between the other cards, then your winnings are doubled, otherwise you lose your winnings.

An ACE has a value of 1 and a KING has a value of 13.

You get 5 "Skips" each time you go to the bonus screen. This allows you to continue playing the bonus game without having to play the current cards. For example, if a QUEEN and a KING were showing, it would be impossible to win because there are no cards with a value between these two cards. Press the SKIP button, and you will get two new cards to play. You can skip until you are out of SKIPS.

You can continue to play the bonus game until you lose. You can quit at any time by hitting the OK button.

# Loading and Saving Games

You can save a game at any time by clicking the SAVE GAME button. You will be able to name your game anything you like up to 30 characters.

You can then load any of your saved games by clicking the LOAD GAME button.

Your current game is saved automatically when you exit the game. When you run the game later, your last game will be loaded automatically.
