OneVision-Art

OneVision-Art Preferences

You open the OneVision-Art Preferences panel through OneVision's *<Info/Preferences>* menu
(;../OneVision/MainMenu/Info/Preferences.rtf;;¬), where you select *<OneVision-Art>* from the pull-down list.

Colors

The upper part of the panel provides four color well icons in which you can specify the colors of different parts of vector elements:
876608_paste.tiff ¬

You can assign any color to these element parts using the color selection panel (;../OneVision/WorkingIntro/Colors.rtf;;¬).

Handle Snap Radius

565709_paste.tiff ¬

The *<Handle Snap Radius>* specifies how close the cursor must be to a handle in order to activate the preselection and making the handle selectable. This distance is measured in pixels. The default setting is five pixels.

The settings in this panel only take effect after you've clicked the

<OK> button. Clicking <*Revert*> reverts the settings to the values that were in effect when you opened the panel or which you validated by clicking <OK> the last time.
