Numbering Pages

885442_paste.tiff ¬522_paste.tiff ¬
This command allows you to enter the page number with which you want the numbering of your document to start.

When you click this command, the *Page Number* panel will appear:
86908_paste.tiff ¬
Figure: The Page Number panel with the command to numbering on the fifth page of the document

Enter the number of the first page to be numbered in the text field. You can enter a negative page number here, which will cause the first page of the document to be numbered with a number lower than 1.

When you click the <*OK*> button, the pages will be numbered according to the entered value. If you click the <*Cancel*> button, the pages will not be numbered, or the current numbering won't be changed.

Note: If you have defined and assigned masterpages for even and odd pages, changing the page numbering can cause a loss of data, in the case that you have modified reference elements on the documentpages (;../../../PageTable/PageTable.rtfd;ReferenzÙnderungen;¬).
