Order Element Before

paste.tiff ⇐

In cases where elements are layered one on top of another, this command lets you place a selected element (or elements) in front of any other element you choose.

When you click the button, the mouse cursor will change to the following shape:

781221_beforeCursor.tiff ↵

With this cursor you can choose the element in front of which you want to place the selected element(s).

Next: ;OrderBehind.rtf; ↵ Order Element Behind
