Convert Masterpage Link Elements

306285_paste.tiff ↵201253_paste.tiff ↵paste.tiff ↵

This command converts one or more selected masterpage link elements to "real" elements, i.e., all references to the masterpage are removed. Then, a copy from the element of the masterpage is created on the documentpage, which is completely independent from the masterpage.

This command is only accessible if a masterpage is assigned to the current documentpage and at least one masterpage link element is selected.
