Leave Group

1080_paste.tiff ↩354475_paste.tiff ↩

The command `<Leave>` returns you to normal working mode or moves you one step higher in the group hierarchy. The group you are leaving will once again be displayed with its group frame.

The group level in which you are currently working is shown in the upper right corner of your document window's frame (see `<Document Information>`

;../../../../WorkingIntro/Dokumentinfo.rtf;Gruppenlevel;↩).

The hierarchy of the elements within the group (that is, the layer

they are on) as well as that of the elements outside of the group remains the same unless you deliberately change it.
