## paste.tiff ↪ **Color Wheel Model**

Clicking this icon in the color selection panel enables you to select colors from the color wheel:

410571\_paste.tiff ↪

*Figure: The color wheel, used for selecting colors*

Click the color you want in the color wheel, or drag a rectangle in the wheel. The selected color will then appear in the color well.

At the right of the color wheel is a slider for adjusting the brightness of the selected color.

The chosen color will automatically appear in the color well. Using *Drag-and-Drop*, you can move it from there to a OneVision panel. If the color well icon in that panel is activated (displaying a white frame), the changes you make to a color will be automatically transferred there.
