These commands apply to selected text or the text in which the cursor is positioned.

You can change fonts to *<Bold>* using either this command or the keyboard shortcuts *Command-b*. This command will work only if the bold version of the current font is available.

When the selected text is formatted using a bold font, the switch will be labeled *<Unbold>*.

Using the command `<Unbold>` or `<Lighter>` (`;Lighter.rtf;;¬`) will reverse the `<Bold>` command.

Next: `;Italic.rtf;;¬` Italic/Unitalic
