0b815f5f84012584067f411b312d37OneVision: Introduction to Working ± RGB  
Model

paste.tiff ↪ **RGB Model**

This icon in the color selection panel allows you to select which color model you want to work with. The current choices are grayscale, RGB, CMYK, and HSB. The icon for the color model always shows the image of the currently selected model.

In the color selection panel, click on the icon for the RGB model, if it isn't already active.

403973\_paste.tiff ↪ *Figure: The RGB Model icon*

Adjust the sliders to blend a color from the component colors, or enter the desired numerical values into the text fields on the right.

822636\_paste.tiff ↪ *Figure: Sliders for adjusting the RGB values*

The chosen color will automatically appear in the color well. Using *Drag-and-Drop*, you can move it from there to a OneVision panel. If the color well icon in that panel is activated (displaying a white frame), the changes you make to a color will be automatically transferred there.
