0b815f5f84012584067f411b312d37OneVision-Art: Path Editor ± Outline

VektorTool2.tiff ↗ Path Outline

This portion of the path editor panel is used to control path perimeters, regardless of whether the paths are open or closed, filled or unfilled (also see <Path Fill> ;interior.rtfid;;↗).

paste.tiff ↗

Figure: The portion of the Path Editor controlling the path outline.

Outline

If you activate the <Outline> option by checking the button on the right, the outline of the selected element will be visible.

Color Well Icon

You can select the outline's display color by clicking on the frame of the color well icon, which brings up the color selection panel (;↗;../OneVision/WorkingIntro/Colors.rtfid;;↗).

Linienstil;↗Line Style Icon *Linienstil;*↗

Clicking the frame of the line style icon opens the Line Style Editor (;../OneVision/WorkingIntro/TMSStrokeAttributesWell.rtfid;;↗), where you can modify the appearance of the path outline.
