Italic/Unitalic

paste.tiff ↵

248845_paste.tiff ↵

You can change type to *<Italic>* by using this command or the keyboard shortcuts *Command-i*. This command will only work if the italic (or oblique) version of the font is available.

If an italic font is used for the selected text, the switch will be labeled *<Unitalic>*. Using the command *<Unitalic>* will reverse the *<Italic>* command.

These commands apply to selected text or to text in which the

cursor is positioned.
