## Check Spelling

187499\_paste.tiff ↵

The *<Check Spelling>* command immediately start checking your text for misspelled words. This is the same as clicking the *<Find Next>* command in the Spelling panel. If a misspelled word is found, the *NEXTSTEP Spelling* panel is opened. Otherwise an attention panel announces that no misspelling has been found.

You can also use the *Command-;* keyboard alternative for opening the *Spelling* panel.

For detailed information about it's usage, please refer to the *NEXTSTEP* user manual or the online help of the panel itself.
