0b815f5f84012584067f411b312d37OneVision: Edit ± Cut

Cut

paste.tiff ↵

The *<Cut>* command deletes the selected element(s) from the document and places them in the pasteboard. If there is already something in the pasteboard, it will be deleted.

Note: OneVision elements that have been copied to the pasteboard for pasting them into documents of other applications are converted to EPS format at runtime. After quitting OneVision naturally can't do this conversion anymore. Therefore, if OneVision elements are in the pasteboard when quitting OneVision, you are asked whether you want them to be converted before quitting. Beware, depending on the elements in the pasteboard, this conversion can cause a huge

amount of data that might harm your system.
