0b815f5f84012584067f411b312d37OneVision: Page ± Delete

## Delete Page(s)

885442\_paste.tiff ↵964824\_paste.tiff ↵

This command allows you to delete one or more pages from your document.

When you click <Delete> when working on documentpages, the *Delete Page(s)* panel will appear:

152830\_paste.tiff ↵

*Figure: The Delete Page(s) panel, demonstrating the command to delete the pages numbered 3 through 7, inclusive.*

When you are working on masterpages, you can move masterpages:

410639\_paste.tiff ↵

*Figure: The Delete Masterpage(s) panel*

You can enter the numbers of the first and the last page you want to delete in the two text fields.

In the preferences to masterpages

(;../Info/Preferences.rtf;Musterseiten;↵) you can specify how to treat reference elements, i.e. elements that appear on a documentpage because of an assigned masterpage, when the masterpage is deleted.

Note: At least one page must always remain in the document.

Clicking the <OK> button will start deleting the pages. If you click

the <Cancel> button, no pages will be deleted.

Note: If you have defined and assigned masterpages for even and odd pages, deleting an odd number of pages can cause a loss of data, in the case that you have modified reference elements on the documentpages

(;../../../../PageTable/PageTable.rtf;ReferenzÄnderungen;¬).

Next: ;ReleaseMP.rtf;¬ Release Masterpage
