Introduction to the Info Menu

paste.tiff ¬

The *Info* menu contains the commands used for getting information about particular aspects of OneVision.

511285_paste.tiff ¬ *Figure: Info menu commands*

This menu also contains the commands for configuring your OneVision installation and licensing the modules you need.
It also contains the *Preferences* panel for personalizing your installations.

Help is always available by pressing the *F1* key. This will turn your mouse cursor into a question mark. Move this question mark to the function about which you want information and press the left mouse button to open a help file on that subject.
