Turn Super Mode On/Off

427447_paste.tiff ¬
and
299712_paste.tiff ¬

The <Turn *Super Mode On/Off>* command switches the super mode on or off. The labeling of the menu command will change in accordance to the current setting.

When in super mode, you can manipulate elements that are protected and normally can't be changed.

You can protect elements and remove protection using *<Element Options>* (;../Element/ElementInspector.rtfd;Option;¬) in the Element

Inspector.
