ImpoStrip Filter

This module doesn't provide a user interface. You only can load it in the Module Controller (;../OneVision/MainMenu/Info/ModuleController.rtfd;;¬).

If this module is loaded (and licensed), special PostScript comments are included to all PostScript output via the *Print* panel. These comments ensure that the imposition software ImpoStrip will correctly interpret and handle the your documents.

The included comments don't affect other software of output devices, if ImpoStrip isn't used.

Note: This module isn't part of the standard package of Trialog or DigiScript. It has to be licensed separately.
