Index Notes

OneVision is a modular publishing environment. Depending on the loaded modules the corresponding manual files are included to the system automatically. The table of contents is also built up in accordance to the modules available in your configuration.

This functionality unfortunately isn't (yet) available for the index. It must be created manually. If there is a link for which no destination is available the only action will be a ªplopº or whatever you've set as the system sound.

We would like to excuse for such unconveniencies and try to keep the index up to date as much as possible. It would be very helpful to us and all OneVision users if you told us about any error you are discovering.
