Using the Right Mouse Button in   NEXTSTEP

In OneVision the left and the right mouse button are used for different functions. To benefit from this versatility, the button *<Enabled>* from the *Mouse Preferences* concerning the *<Menu Button>* must be selected. (For more information, refer to your NEXTSTEP User's Reference, Chapter 10 <Personalizing Your NeXT   Computer>, Mouse Preferences.)

The following description shows how to activate the right mouse button:

1. Click the *<Preferences>* icon in the dock with your left mouse button.
        20186_paste.tiff ¬

2. In the panel that is brought up, select the symbol below from the slider list and click on it with the left mouse button.
        360185_paste.tiff ¬

3. The *Mouse Preferences* will be displayed. In the portion of the panel which is labeled *Menu Button,* make sure that the option *<Enabled>*, is selected. If you are handling your mouse with your right hand, the button *<Right>* should be activated.

        paste.tiff ¬

Note: If you have set the mouse for left-handed use, both mouse buttons are swapped. Therefore, you will need to reverse the descriptions here for the left and right mouse button
