OneVision-Type Preferences

The OneVision-Type preferences panel is opened from the main menu. Select <*Info/Preferences*> (;../OneVision/MainMenu/Info/Preferences.rtfd;;¬) and then choose <*OneVision-Type*> from the pop-up list.

File Extensions for Drag-and-Drop
Here you can determine which file formats are accepted when importing text using *Drag-and-Drop*. The default setting lists the file extensions for the common text formats used in NEXTSTEP.

Colors
Marked Text
This color well icon (;../OneVision/WorkingIntro/Colors.rtfd;;¬) is used to set the background color for marked text blocks.

Anchor Character
This color well icon (;../OneVision/WorkingIntro/Colors.rtfd;;¬) is used to set the color of the anchor character that is inserted into the text for marking the anchor position of marginal notes (;TMSAnkerTool.rtfd;;¬).

Show Text Flow Marks
If this option is checked, special symbols indicate whether text flows out of a frame or into a frame. For a description of these marks,

please refer to the chapter <Text Frame Piping>
(;Piping.rtfd;Textfluûmarkierungen;¬).

Show Columns
Checking this options displays both the borders of the columns in a text element and the element frame itself when your are in ªEdit Elementº mode. If you have defined multiple columns the gutters between the columns become visible.
